dataset.csv

headers

```
Roll,Assignment-1,Assignment-2,Assignment-3,Assignment-
4,Assignment-5,Final,Mid,Section
Roll -> Your roll
Assignment mark [0, 15]
Final [0, 60]
Mid [0, 25]
Section can be either 'A' or 'B'
You need to detect whether a student with certain record is
from A or B
Normalize: (x - x_min) / range
```

Split the dataset into training(80%), validation(10%) and testing(10%) sets.
